

PROCEEDINGS
of
The Third Yale Workshop on
Applications of Adaptive Systems Theory

Yale University
June, 1983

TABLE OF CONTENTS

THEORY I	MACHINE LEARNING
"Robustness of Reduced-Order Adaptive Model-Following," R. L. Kosut, C. R. Johnson, Jr., and B. D. O. Anderson.....1	"Inductive Learning: A Review of Some Recent Work," R. S. Michalski.....81
"On the Stable Adaptive Control of Non-minimum Phase Plants," G. Kreisselmeier.....7	"Adaptive Control Algorithms for Parallel Systems," J. H. Holland.....83
"Persistent Excitation and Robust Adaptive Algorithms," K. S. Narendra and A. M. Annaswamy.....11	"An AI Approach to Learning: An Example," E. Solway.....84
APPLICATIONS I	LEARNING AUTOMATA
"Roll Stabilization of Ships by Means of the Rudder," J. van Amerongen, H. R. van Nauta Lemke, and P. G. M. van der Klugt.....19	"Recent Developments in Learning Automata - Theory and Applications," K. S. Narendra.....90
"Model Identification for Improved Sensor Accuracy," V. N. Subbarao and P. Huntley.....27	Theory
"An Application of Adaptive Control Theory to an Industrial Temperature Control Problem," A. C. Englander.....33	"An N-Player Game with Identical Payoffs," R. Wheeler.....100
"Model Reference Adaptive Control of a Multivariable Non-minimum Phase Pilot Plant," V. Hahn, H. Unbehauen, and U. Nadolph.....41	"A Learning Approach to Priority Assignment in a Two Class M/M/1 Queueing System with Unknown Parameters," M. R. Meybodi and S. Lakshmivarahan.....106
THEORY II	"An Absolutely Expedient Nonlinear Reinforcement Scheme Under a Nonstationary Multi-Teacher Environment and Its Applications to Practical Problems," N. Baba.....110
"Robust Identification for a Self-Tuning Controller," P. D. Hansen.....47	Applications
"Reduced Order Model Direct Multivariable Adaptive Control," I. Bar-Kana and H. Kaufman.....51	"Learning Automata Control of Computer Communications Networks," P. Mars, K. S. Narendra, and M. Chrystall.....114
SIGNAL PROCESSING	"Learning Automata and Telecommunications Switching," L. G. Mason.....120
"The Effect of a Moving Interference on an Adaptive Array Processor," F. B. Tuteur.....57	"Learning Networks for Database Access," F. Cohen.....129
"Stability Analysis of LMS Filters," E. Weinstein and A. Feuer.....64	"Application of Learning Theory to Communication Networks Control," P. R. Srikanta Kumar.....135
"An Adaptive Method to Improve Signal Detectability in Non-Gaussian Noise Environments," R. F. Dwyer.....68	"Learning Automata Routing in Data Communication Networks," O. V. Nedzelnitsky, Jr.142
"Estimation of Seismic Reflectivity Sequence Using Adaptive techniques," A. K. Mahalanabis, S. Prasad, and K. P. Mohandas.....74	

THEORY III

"Improvement of Robustness of Adaptive Schemes," P. Ioannou and P. Kokotovic.....	148
"Some Critical Issues in Stable Finite-Dimensional Adaptive Control of Linear Distributed Parameter Systems," M. Balas.....	154
"Adaptive Control of Interconnected Systems," P. Ioannou.....	164
"Time Limited Identification of Continuous Systems using Trigonometric Modulating Functions," A. E. Pearson and F. C. Lee.....	168

ROBOTICS

"Adaptive Control in Robotic Manipulators," A. J. Koivo.....	174
"Robot Control Issues and Insight," C. P. Neuman and V. D. Tourassis.....	179
"Resolved Motion Adaptive Control for Mechanical Manipulators," C. S. G. Lee and B H. Lee.....	190
"Nonlinear Simplified Models and Robotic Manipulators," A. Desrochers and C. M. Seaman.....	197
"MRAC Control of Robotic Manipulators," C. P. Neuman and H. W. Stone.....	203

THEORY IV

"An Overview of Multivariable Adaptive Control," H. Elliott.....	211
"Design of Dynamic Precompensators for the Adaptive Control of Multivariable Systems," R. P. Singh and K. S. Narendra.....	218
"Robustness of Model Reference Adaptive Control," L. Praly.....	224

APPLICATIONS II

"The Effects of an Unmeasurable Step Disturbance on Recursive Parameter Estimation and Adaptive Control," T. H. Lee and C. C. Hang.....	227
"A Robust Adaptive Controller for Relay-Actuated Processes," J. van Amerongen and G. Honderd.....	234
"Using Ada as a Notation for Adaptive Control Systems," R. S. Freedman.....	239
"Control of Catalytic Fluidized Bed Reactor Based on Learning Theory," M. S. Koutchoukali, C. Laguerie, and K. Najim.....	245
"Experimental Analysis of Adaptive Controllers," E. H. Bristol.....	249
